Stop Tyre Trouble In Its Tracks

Our real-time monitoring system helps fleet managers prevent tyre issues before they happen, putting you firmly in control of managing maintenance costs and safety concerns

ConnecTyre | GoMetro

The Risks

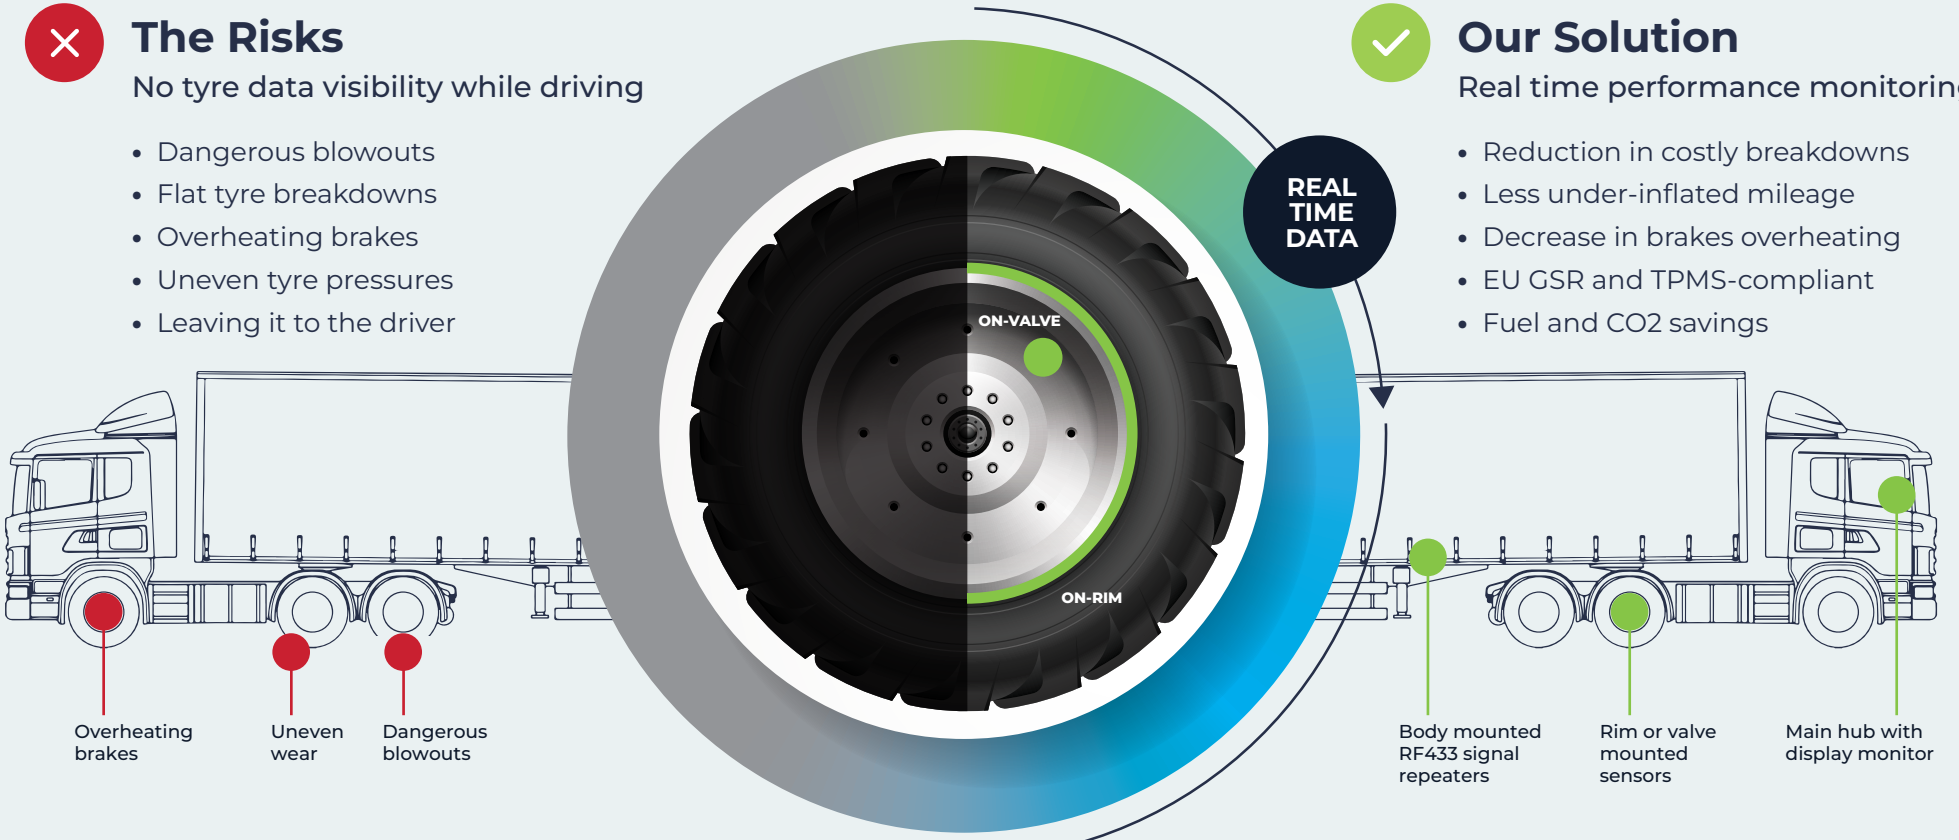
No tyre data visibility while driving

- Dangerous blowouts
- Flat tyre breakdowns
- Overheating brakes
- Uneven tyre pressures
- Leaving it to the driver

Our Solution

Real time performance monitoring

- Reduction in costly breakdowns
- Less under-inflated mileage
- Decrease in brakes overheating
- EU GSR and TPMS-compliant
- Fuel and CO2 savings



What is ConnecTyre?

ConnecTyre is an advanced on-the-rim or valve-mounted electronic Tyre Pressure Monitoring System (TPMS). Putting control firmly in your hands, not your drivers

Implementation Process

- 4-5 hours install per truck
- Durable sensors: 3+ years, replaceable
- Rollout across your fleet in stages
- Mobile alerts for up to 10 contacts
- Data included in monthly subscription
- Financing options available

The Outcome

Achieve operational efficiency with reduced fuel consumption, extended tyre life, and a lower total cost of ownership by having your fleets pressure and temperature data at your fingertips
